PREMIER PUPPY WELLNESS PROGRAM

Congratulations on your new puppy! The first year of your puppy's life is extremely important to their future health and happiness. Our goal is to start your puppy out right and help you keep them healthy and happy for many, many years. We have packaged our recommendations for preventive care together and are offering them at a discounted price to allow you to give your puppy the very best.

STARTING AT 10-12 WEEKS

- ✓ Comprehensive physical exam and medical evaluations every three weeks for 3 visits. We use fear free techniques in this nose to tail exam with life-style assessment to monitor your puppy's development and identify any areas that might need special attention.
- ✓ Distemper combination vaccine at each visit until they are at least 16 weeks of age. This vaccine helps protect against distemper, hepatitis, parvovirus, leptospirosis and parainfluenza.
- ✓ Rabies vaccine, certificate, and tag to comply with state and local laws. This vaccine helps protect you and your pet against rabies, a deadly neurologic virus. Use the certificate to register with your locality.
- ✓ Fecal parasite screenings on your first and last visit. It is not unusual for puppies to have intestinal parasites such as roundworms or hookworms. Our fecal tests look for these as well as other parasites that could be transmitted to you.
- ✓ Bordetella vaccine to protect against the upper respiratory infection also known as "kennel cough".
- ✓ Toenail trim each program visit to keep those sharp puppy nails under control.
- ✓ 3 months of heartworm prevention that additionally protects you and your pet from intestinal parasites.
- ✓ \$5 discount on HomeAgain microchip identification and registration. Permanent identification so your puppy is quickly and safely returned home should they ever get lost.
- ✓ \$10 discount on the spay/neuter surgery.
- ✓ Fear Free techniques are utilized at every visit to help your puppy feel safe and comfortable at the hospital. Monthly socialization events are available on the second Saturday of every month. For increased success we advise you to begin fear free preparation at home. We provide informative fear free material and unlimited fear free experiences to help your new puppy to create positive memories about the hospital and look forward to coming here for a lifetime. Additional resources can be found at www.fearfreehappyhomes.com/
